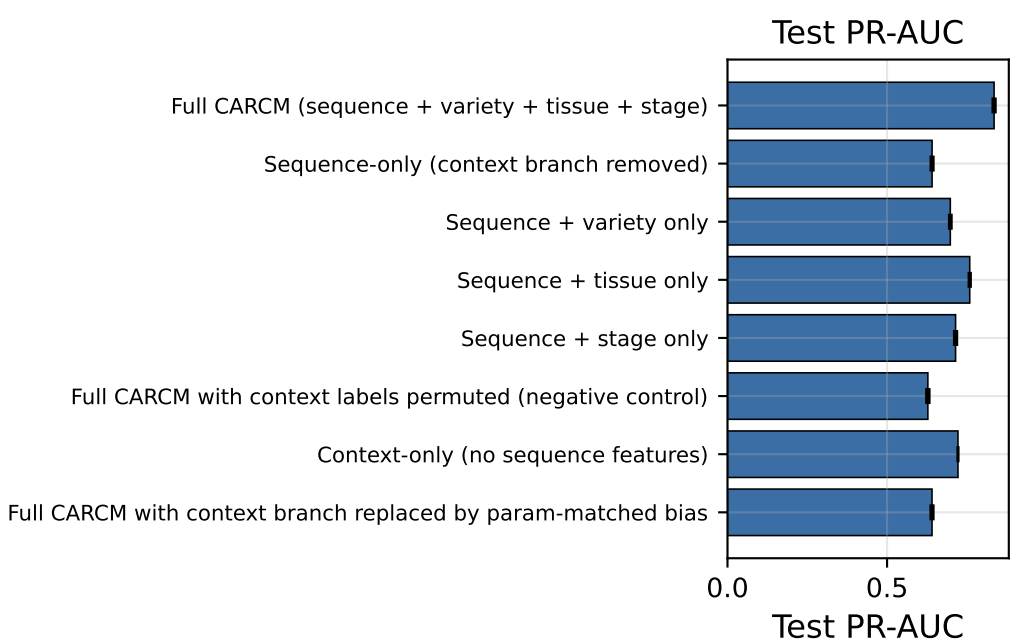
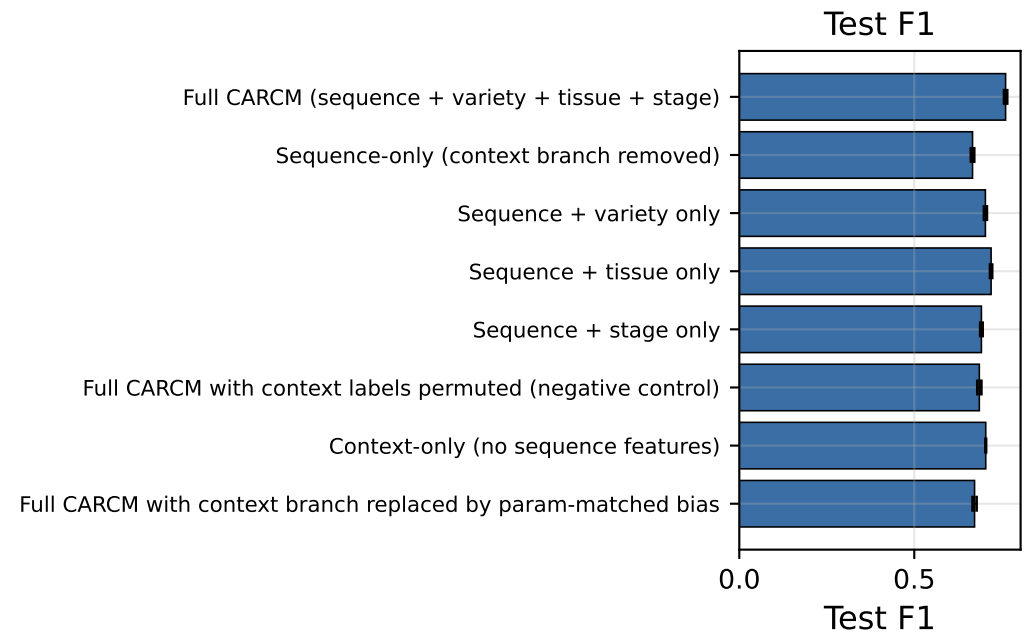
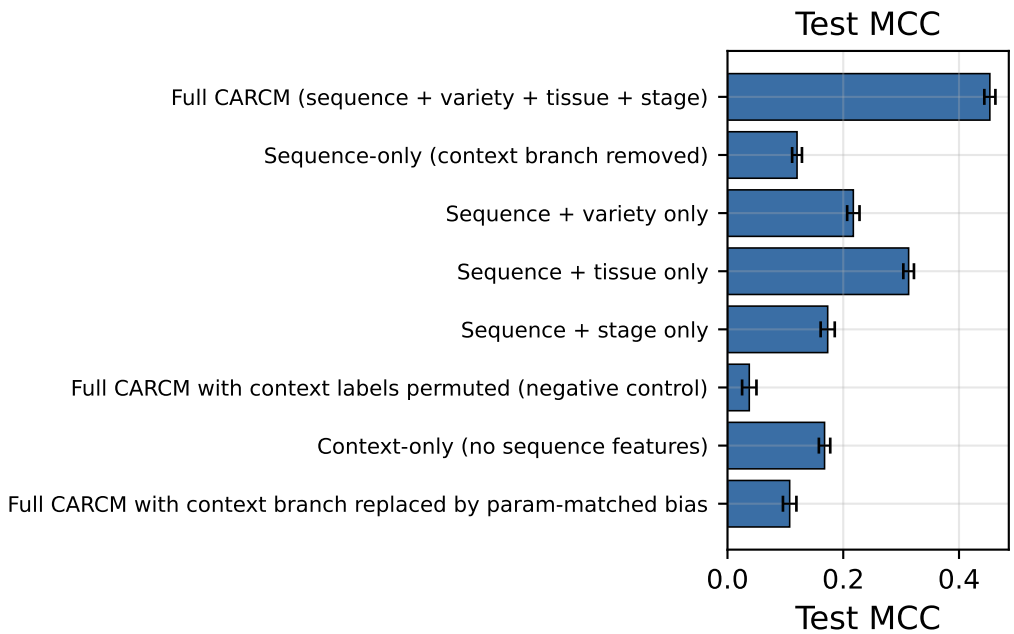
Test AUC
Full CARCM (sequence + variety + tissue + stage)
Sequence-only (context branch removed)
Sequence + variety only
Sequence + tissue only
Sequence + stage only
Full CARCM with context labels permuted (negative control)
Context-only (no sequence features)
Full CARCM with context branch replaced by param-matched bias
0.0
0.5
Test AUC



Test PR-AUC
Full CARCM (sequence + variety + tissue + stage)
Sequence-only (context branch removed)
Sequence + variety only
Sequence + tissue only
Sequence + stage only
Full CARCM with context labels permuted (negative control)
Context-only (no sequence features)
Full CARCM with context branch replaced by param-matched bias
0.0
0.5
Test PR-AUC



Test F1
Full CARCM (sequence + variety + tissue + stage)
Sequence-only (context branch removed)
Sequence + variety only
Sequence + tissue only
Sequence + stage only
Full CARCM with context labels permuted (negative control)
Context-only (no sequence features)
Full CARCM with context branch replaced by param-matched bias
0.0
0.5
Test F1



Test MCC
Full CARCM (sequence + variety + tissue + stage)
Sequence-only (context branch removed)
Sequence + variety only
Sequence + tissue only
Sequence + stage only
Full CARCM with context labels permuted (negative control)
Context-only (no sequence features)
Full CARCM with context branch replaced by param-matched bias
0.0
0.2
0.4
